

WHO WE ARE

MEI Industrial Solutions is one of North America's largest and most trusted providers of end-to-end industrial solutions. With execution capabilities across the lower 48 states, Canada, and Mexico, we deliver customized solutions designed to meet the unique demands of every project. Our experienced team brings decades of expertise to solve complex industrial challenges— always with a focus on safety, precision, and reliability.

WHAT IS THE MEI RIGGING APPRENTICESHIP PROGRAM?

The MEI Rigging Apprenticeship Program has been carefully constructed by industry leaders to create a clear, structured training path that connects paid work experience (OJT), classroom instruction, and guidance by program mentors. The program is intentionally designed for team members with little or no prior experience in the machinery moving or rigging industries and prepares new team members with the core rigging skills and operational insight needed to confidently begin a rewarding career.

SKILL TOPICS INCLUDED IN THE PROGRAM

- MEI Safety Culture
- Forklift Operation
- Versa Lift Operations
- Pre-Rig/Lift Inspection
- Ground & Floor Protection
- Skate, Dolly & Pallet Jack Application
- Basic Jacking Applications
- Blocking & Cribbing
- Machine Securement
- Machine Leveling

Are you interested in an opportunity to get your foot in the door for a Skilled Trades career?

Do you want to be paid while you learn important skills in one of the fastest growing industries in the country?

Would you like to start a career journey that includes a development path within a growing national company?

HOW IT WORKS

The MEI Rigging Apprenticeship Program offers a comprehensive learning experience that blends classroom instruction, managed mentorship, and supervised on-the-job training to gain proficiency in the knowledge, skills, and abilities (KSA) needed in the industry. The 4-year program will see apprentices progress through a multi-workshop format, gaining technical competencies in rigging fundamentals, job site safety protocols, and leadership essentials. As they advance, apprentices are introduced to progressively complex scenarios that test their expanding knowledge and skillsets. Performance is evaluated in classroom settings, via structured activities and through real-world (on-the-job) applications to ensure competence and job readiness.

*Please note that a requirement of the MEI Rigging Apprenticeship program is the willingness and ability to travel throughout the assigned region and, when necessary, nationwide to support apprenticeship instruction and related studies training. Travel may include overnight stays, commercial airline travel, rental vehicles, hotels, and other transportation arrangements coordinated by the company.
